

INTERNATIONAL PHARMACY & SAFETY PROTOCOLS

Consumers in the United States pay up to **16 times** more than other countries for the exact same name brand medications.

Our international pharmacy management firm has been sourcing these medications for employers over the past two decades without incident.

ScriptSourcing sources these medications through tier one countries that have the same or higher standards as the FDA. Our medications are sourced through Canada, United Kingdom, Australia, and New Zealand. These are English speaking countries that negotiate directly with the pharmaceutical manufacturers.

FACTS

20% of an employer's population, has at least 1 chronic condition and take 4 or more medications. Researchers estimate that eliminating copayments for patients at medium to high risk of heart disease would improve adherence sufficiently to avoid 90,000 hospitalizations and generate savings exceeding \$1 billion.

SAFETY PROTOCOL

All medications are factory packaged and sealed.

Medications must be FDA approved.

Medications are shipped in a 90-day supply.

We do not source narcotics.

Members will be contacted directly for quarterly reorders.

All pharmacies are inspected and maintain pharmacists on-site.

*Members must have a 30 day supply of medication prior to enrollment.

FEATURES & BENEFITS

\$0 Rx Copay for qualifying medications

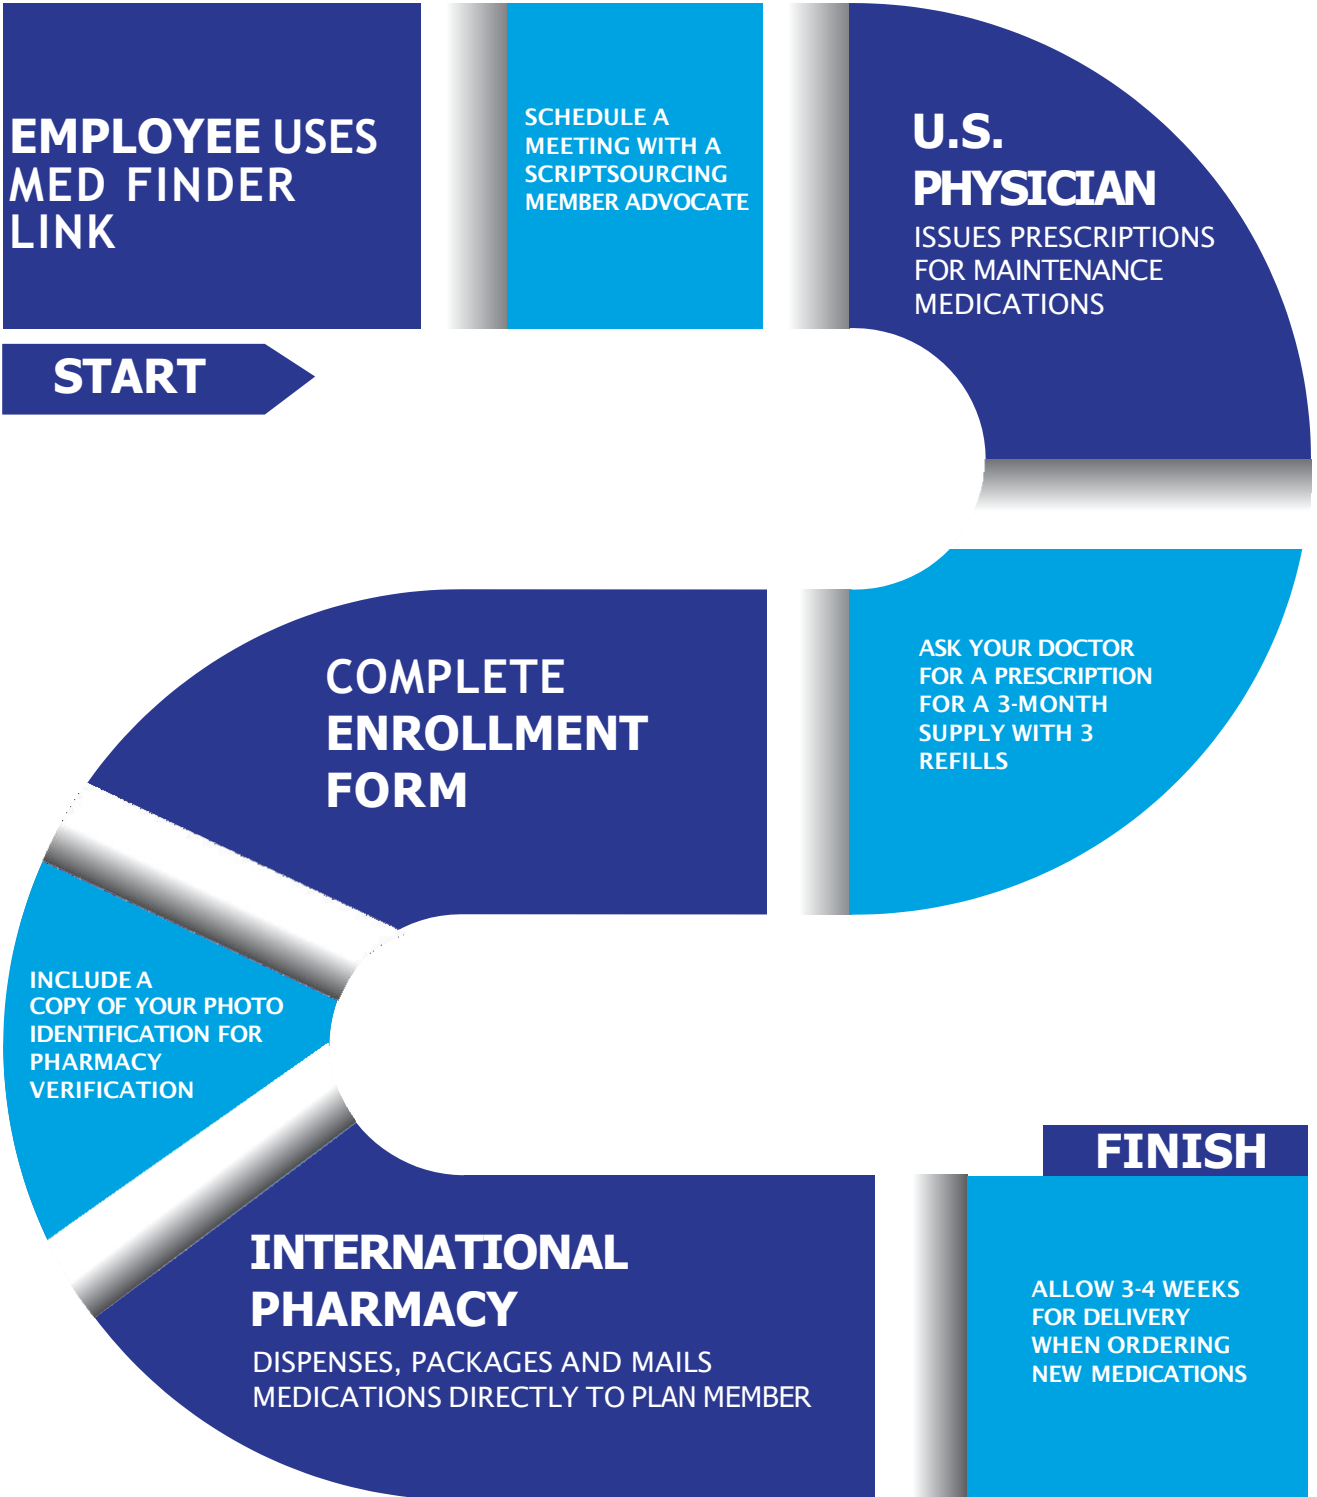

\$0 Shipping & Handling Fees

Comprehensive employee engagement program

HOW DOES IT WORK

Determine if any of your current brand-name medications are available through the IPP program

(1) INTRODUCTION

The ScriptSourcing goal is to provide safe affordable Brand Name maintenance medications at a reduced cost to American residents.

The substantial savings opportunities that the ScriptSourcing mail order programs provide are due to the low prices negotiated between most developed nations and the pharmaceutical companies.

ScriptSourcing contracts government-licensed pharmacies in Canada, the United Kingdom, Australia, and New Zealand to supply Brand Name medications, packaged and sealed by the original manufacturer, for direct delivery to all participants.

All ScriptSourcing programs are based on **voluntary participation** in order to comply with FDA directives that allow individuals to obtain medications for personal use.

(2) WHAT IS SCRIPTSOURCING

ScriptSourcing works with employers to rein in the costs of Rx spending through a coordinated, seamless approach involving several key programs. We have developed a system that helps employers and employees significantly mitigate Rx costs and risks without compromising benefits.

(3) INTERNATIONAL FORMULARIES

The ScriptSourcing offers a formulary of over 500 widely used Brand Name maintenance medications. In 2013, the formulary was expanded to include hundreds of specialty medications.

Excluded from this list are:

- Acute medications (antibiotics)
- Controlled substances (narcotics)
- Targeted substances (benzodiazepines)
- Medications which require ongoing monitoring/adjustments by primary care physicians
- Precursor substances (Allegra-D)
- Lifestyle medications
- Generic multi-source medications

The primary goal is to ensure public safety. Medications are packaged by the manufacturer, distributed by government-regulated wholesalers, prescribed by practicing physicians, labeled and dispensed by licensed pharmacists and delivered directly to the end user.

To place an international order each prescription follows the equivalent fulfillment process as in America. Therefore, each international order must be reviewed and prescribed by a practicing licensed physician, dispensed by a practicing licensed pharmacist, then packaged at an accredited licensed pharmacy and shipped directly to the patient.

(4) HIPAA COMPLIANCE

All materials and information acquired by ScriptSourcing are kept in the strictest of confidence and only used for the prescribing of medications. ScriptSourcing plans are designed to be completely compliant with the Canadian Privacy Laws (PIPEDA), equivalent to the U.S. HIPAA standards, and all Privacy Laws of each country supplying medications to plan participants.

(5) SAFETY PROTOCOLS

- Tier One country sourcing
- U.S. prescribing physicians' licensing verification
- Order processing
- American based Drug Utilization Reviews (DUR)
- Identification and assessment of drug allergies & interactions
- Maintaining and updating health/drug profiles of clients
- Internal incident reporting & logging
- Patient counseling standards
- Patient education leaflets are included with each order
- Standardized prescription labels
- Refill medication notification and controls:
 - All patients are personally contacted to ensure timely refills
 - All changes are file documented and reviewed
 - Refills are issued only when needed and confirmed
- Consultations with the primary care physicians are conducted as required

Pharmacy Accreditation

- License verification
- Review dispensing procedures
- Review pharmacist / technician ratios
- Conduct a complete audit and inspection

Medication Procurement

- Tier One countries only
- Government certified products
- Federally approved facilities
- Manufacturers' original sealed packaging

(6) SERVICE SUPPORT

Our staff is dedicated to providing 100% satisfaction to both the company and all individual participants. Our goal is to provide a positive "yes" environment with direct lines of communication for the immediate resolution of all concerns.

Member Benefits

- Ongoing open enrollment
- Dedicated toll-free telephone and fax numbers
- Call Center Customer Service Representatives
- Monday to Friday, 8:30am-5:00pm EST/EDT
- Quarterly Call Center contacts
- Copay reimbursement policy
- Certified manufacturers' sealed package guarantee

FREQUENTLY ASKED QUESTIONS

Do I have to be enrolled in medical coverage on my employer's plan to participate in the ScriptSourcing program?

Yes. In order to be eligible to participate in the ScriptSourcing program you, your spouse, and/or your dependent must be currently enrolled in medical coverage on your employer's health plan.

How do I enroll to participate in the ScriptSourcing program?

To enroll to participate*, visit <https://scriptsourcing.com/med-finder/> and schedule a call with a ScriptSourcing executive.

- Ask your doctor for a 3-month supply with 3 refills
- Include a copy of your photo identification for pharmacy verification
- Allow 4 weeks for delivery when ordering new medications

*Before ordering through ScriptSourcing, you must have taken your Rx for at least 30 days.

Do I have to pay to fill out an enrollment form to participate?

No. There are \$0 Copays and no out-of-pocket expenses to participate in the ScriptSourcing program.

What if I have a change in my medication?

You should contact ScriptSourcing to inform them of any changes to your medications including if your doctor has changed your dosage or frequency, added a new medication, or taken you off any medication ScriptSourcing is assisting you with.

What if I move?

Notify ScriptSourcing immediately of any changes in address, phone number, email address, doctor's name, doctor's address, or doctor's phone number.

How are refills handled?

Refills are issued only when needed and confirmed.

What if I want to cancel my service?

You can cancel the program at any time by calling or emailing ScriptSourcing directly. The ScriptSourcing program is a voluntary option, not a mandate.

FREQUENTLY ASKED QUESTIONS

Please review our frequently asked questions and answers. If your question is not answered or you would like more information, please visit www.scriptsourcing.com or contact your ScriptSourcing executive.

What is ScriptSourcing?

ScriptSourcing is a program developed for the residents of the United States to assist them in obtaining safe and affordable prescription medications from licensed, inspected pharmacies in Canada, Australia, and the United Kingdom. Medications are dispensed only on a written prescription issued by the patient's own physician. The dispensing pharmacy will deliver the medicine directly to the patient.

Is ScriptSourcing a pharmacy?

No. ScriptSourcing is a service that will connect an American consumer with an Australian, British, or Canadian licensed pharmacy that can dispense, at the lowest available price, the brand-name medicine prescribed by the patient's doctor. Licensed pharmacists dispense the medicine and arrange for its delivery directly to the consumer.

Is it possible to order medicine from ScriptSourcing over the Internet or from the ScriptSourcing website?

No. Orders may be placed only after the individual consumer has entered into a written agreement with ScriptSourcing in which ScriptSourcing is appointed as the consumer's agent authorized to shop for the patient in the global marketplace. Every order must be accompanied by a written prescription, issued by the patient's own physician, which will be verified and authenticated.

Which medicines are included in the ScriptSourcing program?

At this time, more than 500 of the most commonly prescribed brand-name drugs are included in the ScriptSourcing program. These are maintenance medicines people take for long-term conditions such as high blood pressure, cholesterol, heartburn, arthritis, diabetes, and other specialty medications taken for chronic diseases. For a full list of qualifying medications, visit <https://scriptsourcing.com/med-finder/>.

Which medicines are excluded in the ScriptSourcing program?

- Acute medications (antibiotics)
- Controlled substances (narcotics)
- Targeted substances (benzodiazepines)
- Medications which require ongoing monitoring/adjustments by primary care physicians
- Precursor substances (Allegra-D)
- Lifestyle medications
- Generic medications

Why does ScriptSourcing assist only in the acquisition of brand-name prescription medicines?

Brand-name and specialty medicines are made by known manufacturers and licensees. It is sometimes harder to document the sources of some generic and other non-brand-name medicines. By limiting the acquisition of medicines to these certified brand-name drugs, ScriptSourcing can help consumers ensure that the medicines they receive are authentic, safe, and exactly what the doctor ordered.
